

MPS No. 1022

Subject: Compatible Adhesives

Date: June 2012 (Revised January 2019)

ThermaFoam R-Control insulation is often applied to various substrates with the use of adhesives. Adhesives provide a convenient method for installation of ThermaFoam R-Control insulation products, however, the use of adhesives which are specifically designed for use with polystyrene foams must be used. Some adhesives contain solvents or other additives which can damage polystyrene foams.

The following adhesive manufacturers recommend specific products for use with polystyrene foam. Please contact the manufacturers directly for installation recommendations.

DAP® Beats The Nail
